

State of California - The Resources Agency
DEPARTMENT OF FISH AND GAME
**2008 PRONGHORN ANTELOPE
SURPRISE VALLEY HUNT (ZONE 6)**
www.dfg.ca.gov

General Information: This information has been prepared to assist people hunting antelope in Zone 6. Zone 6 is located in portions of Lassen and Modoc counties.

Regulations: Laws and regulations are designed to conserve wildlife and to provide for an equitable distribution of game mammals. The hunter who knows the laws and regulations can enjoy the hunting experience more. All hunters should read and be familiar with the regulations contained in the Hunting Regulations for Mammals and Furbearers. Visit the above website address for specific zone regulations (hunt zone map, description, and harvest success information can also be viewed at this address). **Please remember that all hunters must return tag report cards to the Department within one week after the close of the pronghorn antelope season regardless of whether a pronghorn antelope was taken.** Remember you must obtain written permission to hunt on private property. Hunter trespass laws are strictly enforced.

Public Land: Zone 6 contains a mixture of both public and private lands. Public lands within the zone are administered by the United States Forest Service (USFS), Modoc National Forest, 800 W 12th Street, Alturas, CA 96101, (530) 233-5811, and the Bureau of Land Management (BLM), P. O. Box 460, Cedarville, CA 96104, (530) 279-6101.

Access: There are extensive tracts of public land with excellent access in Zone 6. Primary roadways in Zone 6 are State Route 299 (central Zone 6) and State Route 395 (western Zone 6). Many county, USFS and BLM roads branch off of these primary roadways providing excellent access to public lands.

Maps: The most comprehensive map of the area is the Modoc National Forest map. BLM surface management maps may also be useful. The BLM surface management maps for Zone 6 are the Alturas and Cedarville maps. United States Geological Service (USGS) topographic maps, are very helpful, especially to depict topographic features that are not displayed on BLM or USFS maps. USGS maps are usually available at backpacking and engineering stores or you can contact the USGS directly in Menlo Park, CA at (650) 853-8300. USFS maps are available locally at most USFS offices; by contacting the USFS Pacific Southwest Regional Office at: 1323 Club Drive, Vallejo, CA 94592 (707-562-8737); or ordered by phone (406-329-3024), fax (406-329-3030), mail at USDA Forest Service, National Forest Store, P.O. Box 8268, Missoula, MT 59807, or on-line at <http://www.nationalforeststore.com/>. BLM maps are also available at all BLM offices or you can contact the BLM at 2800 Cottage Way, Room E2841, Sacramento, CA 95825, (916) 978-4400.

Travel Tips: Zone 6 covers a large geographical area. The terrain can be very steep and rugged. As you should do in all remote areas, hunters are urged to bring a shovel, a good spare tire, extra water, etc. Check with the BLM or USFS for rules and regulations regarding vehicle and travel restrictions in the area.

Weather: The weather in this region is highly variable so BE PREPARED. The weather is usually quite hot and dry, but summer thunder storms are not uncommon. Thunder storms can make roads very difficult, if not impossible, to travel.

Camping: There are numerous designated campgrounds within Zone 6. The facilities available at these campgrounds vary from primitive campsites to campsites with running water. Most campgrounds are clearly marked on USFS and BLM maps. Camping outside of designated campgrounds is usually permitted on BLM and USFS lands. However, during fire season, special regulations may apply and it will be necessary to obtain a fire permit from the USFS or BLM. You can also check with the California Department of Forestry and Fire Protection office for rules in specific areas. Please DO NOT CAMP at springs or other water sources that are important to wildlife and livestock. Remaining at artificial wildlife water sources (guzzlers) can be a Fish and Game violation. YOU can pack water-- birds and animals can't!

Where to Look for Antelope: Pronghorn antelope use open areas with little cover. They are usually found in flat to rolling country, and not too far from water. Antelope run to gain distance from perceived threats. Unlike deer, they do not seek close hiding cover. When scouting or hunting antelope, keep the sun at your back while it is low in the sky (morning or evening). Pronghorn antelope are usually very easy to see at distances of a mile or more under good light conditions.

Because pronghorn antelope are creatures of open habitats, you can hunt them all day. However, you run the risk of exhausting yourself. Try to pace yourself and concentrate hunting in the mornings and evenings. Stalking can be a long process, so remember to bring gloves, knee and elbow padding to protect yourself from sharp rocks. Binoculars and spotting scopes can be a great asset for observing antelope at long distances. Popular areas to look for pronghorn antelope are Snake Lake and Fee Reservoir. Scouting other areas can help you locate an out-of-the-way site that may have less hunter pressure and fit your style of hunting.

Additional Information: If you have any questions regarding this hunt, please contact Mr. Brian Ehler at (530) 254-6808 or Mr. Richard Shinn at (530) 233-3581. Additional information can also be found on the Department's web site at:

<http://www.dfg.ca.gov/wildlife/hunting/pronghorn/>

Again, congratulations and we hope you have an enjoyable hunt.
